

We can't solve the problem entirely. But we can make verification **a lot easier.**

Today the analyst hunts for one line across hundreds of statements. We hand them **the page it came from** — and flag the rows actually worth a second look.

ROW FLAGGED FOR REVIEW

Verified against the Bank statements to journal
entries workbook, 26 rows extracted from 2 Bank
statements PDFs

THE INTERFACE

PDFs in. One **workbook** out.

The accountant uploads all the bank statements at once and downloads the Final workbook.
